

Module 13 Assignment: Executive Briefing 🎬 - Final Project 🚩

Start Assignment

- Due Sunday by 11:59pm
- Points 100
- Submitting a text entry box, a website url, a media recording, or a file upload
- Attempts 0
- Allowed Attempts 2

Transforming the Enterprise with AI UX: Final Project Journey Finale.

This is the last phase of your final project where you wrap everything up.

Executive Briefing

This is the final deliverable in your final project journey.

Over Modules 6–11, you’ve built a comprehensive AI UX solution portfolio to help your selected company navigate enterprise transformation through emerging technologies. Each brief, Conversational AI, Agentic AI, and Emotionally Intelligent AI, represented a strategic layer across different time horizons and customer-experience goals. You also stress-tested these solutions by analyzing internal readiness, knowledge-work impacts, and scenario-based resilience strategies.

In this activity, you will distill your multi-module work into a persuasive, executive-level narrative. In ten minutes, show the C-suite from your selected company how your integrated AI experience roadmap, spanning immediate, near-term, and three-year horizons, creates durable value, mitigates risk, prepares the workforce, and remains resilient amid uncertainty, enabling the company to secure early wins on its AI-transformation journey.

Directions

1. Craft the Strategic Narrative Slide Deck

- Analyze the company’s voice. Examine your selected company’s tone, style, and attitude when it communicates about AI, or about prior technology initiatives.
- Frame the value. Explain how your AI-experience portfolio will help the company either accelerate toward new market advantages or steadily modernize its core business.
- Connect the dots. Demonstrate clear vision, portfolio cohesion, and the compounding impact of the combined initiatives.

Tip for a Compelling Executive Narrative: It’s not about repeating the details of past deliverables but to *synthesize* them into a compelling strategic narrative. Imagine you’re pitching this transformation plan to your company’s executive team or board of directors. Your goal is to inspire confidence, communicate vision, and clearly show how your integrated AI UX strategy creates sustainable business value, now and in the future.

2. Record the Pitch Video (10 min)

Use the slide deck you created and record the pitch video as if you are presenting to the C-suite.

Tip for an Executive Pitch: Keep it tight, visual, and outcome-focused. On this level, the board doesn’t need the *how*, they need the *why* and *so what*. When you speak, do not repeat the text on the slide. Your spoken words and the slide text or images should be complementary, so the audience does not feel torn between listening and reading.

Deliverables

- **Deliverable 1: Submit a video recording (10 min long).** It must include:

- Hook: 15-second opening that frames the business imperative.
- Portfolio Walk-through: 1 slide per time horizon.
- Closing Call-to-Action: 1 slide with next-step decisions for leadership.
- **Deliverable 2: Submit a slide deck. (PDF exported from PowerPoint)**
 - There is no limit on the number of slides, as long as they serve as an aid for your recorded pitch.
 - Include AI Use Disclosure Agreement: Fill out the AI Use Disclosure Agreement from the Orientation module and append it to the end of your assignment submission. It does not count toward the page or word limit.

How to Upload Your Work

What you are submitting:

1. Video (10 minutes long)
2. Slide deck

How to upload your work:

- **Video:**
 - **Use Zoom**  (<https://uis.georgetown.edu/zoom/host/record/>) to record your video or audio. Then you have two options: 1) share a Zoom link to your recording, making sure your instructor has access, OR 2) upload it to your  Google Drive account. Then follow the guide to [embed media using the Google Drive App in Canvas RCE](https://community.canvaslms.com/t5/Student-Guide/How-do-I-embed-a-file-from-Google-Drive-into-the-Rich-Content/ta-p/385)  (<https://community.canvaslms.com/t5/Student-Guide/How-do-I-embed-a-file-from-Google-Drive-into-the-Rich-Content/ta-p/385>). *Note: Embedding files from your Google Drive account will automatically handle file permissions. You don't need to change share settings for peers and instructors to view the embedded file.*
- **Slide deck:**
 - Attach your slides as a PDF file to your post.

Grading

This assignment will be graded based on the rubric attached to this assignment.

Criteria	Ratings				Pts
Strategic Narrative & Executive Framing	35 to >25.2 pts Exemplary Pitch is sharply aligned with company tone and clearly communicates the portfolio’s strategic value; compelling for a C-suite audience.	25.2 to >16.8 pts Competent Pitch aligns reasonably well with company tone and communicates value; persuasive, though with minor lapses in executive focus.	16.8 to >8.4 pts Developing Pitch has unclear tone or limited executive relevance; message lacks strong connection to company priorities.	8.4 to >0 pts Unacceptable Pitch is unfocused or misaligned with executive context; fails to frame strategic value convincingly.	35 pts
AI Transformation Cohesion: Portfolio, Tech, and UX	35 to >25.2 pts Exemplary Initiatives form a tightly integrated portfolio that aligns cutting-edge technology with user-centric design, compounding value across immediate, near-term, and long-term horizons. The narrative clearly shows how each layer reinforces the others to drive a unified AI-transformation strategy that delivers sustainable business impact and superior user experience.	25.2 to >16.8 pts Competent Initiatives are generally aligned, integrating technology and user needs across most horizons. Narrative shows clear value but has minor gaps—some initiatives feel siloed or their cross-impact is only briefly explained.	16.8 to >8.4 pts Developing Portfolio elements are loosely connected; technology and UX considerations appear in isolation, and links across time horizons are weak. Strategy delivers piecemeal benefits with limited evidence of cumulative impact.	8.4 to >0 pts Unacceptable Initiatives are disjointed, with little to no alignment between technology and user experience. Lacks a unifying strategy, leaving executives unclear about overall direction or business value.	35 pts
Integration of Feedback & Course Insights	30 to >21.6 pts Exemplary Clearly integrates feedback and prior learning from course assignments and critiques to enhance final pitch clarity and depth.	21.6 to >14.4 pts Competent Some course insights and peer feedback are incorporated; may lack depth or breadth in integration.	14.4 to >7.2 pts Developing Feedback integration is minimal or superficial; course insights are weakly applied or absent.	7.2 to >0 pts Unacceptable No integration of feedback or course learnings; lacks reflection on previous work.	30 pts
Total Points: 100
