Use Case Overview & Strategic Fit

Autonomous AI Execution: Relocation Services Example

Agentic AI Multi-Agent Team Structure & Role Map

The "Moving Concierge" Multi-Agent Team (Hierarchical)

Laszlo (The Orchestrator/Manager Agent)

Manages the human interaction, gathers the user's moving profile, and delegates tasks to specialized agents using the Model Context Protocol (MCP)

Teammate 1: Vendor Outreach Agent

Uses web search and email APIs to find highly-rated local truck rentals and labor helpers, sends out automated requests for quotes (RFQs), and monitors the inbox for replies

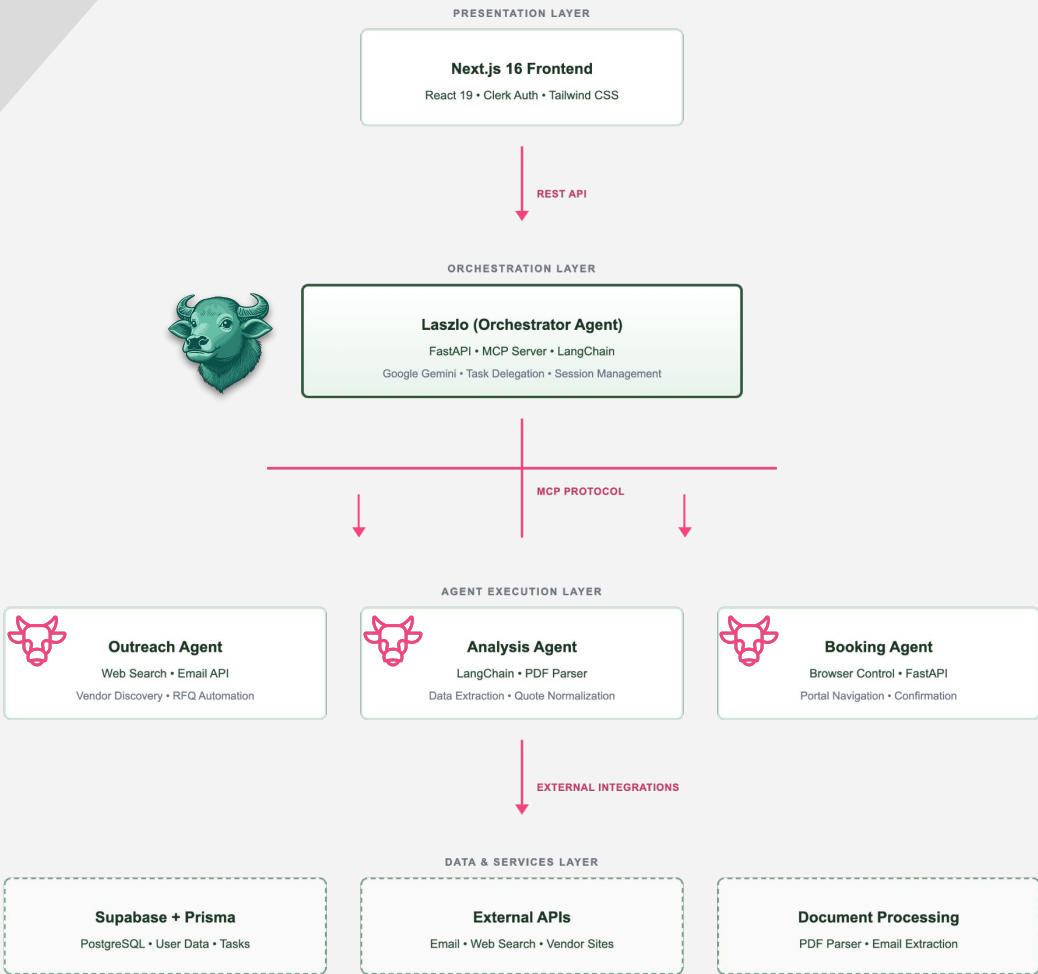

Teammate 2: Quote Analysis Agent

Parses unstructured email replies and PDF estimates, extracting pricing, mileage limits, and hidden fees to create an "apples-to-apples" comparison dataset

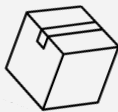

Teammate 3: Booking/Execution Agent

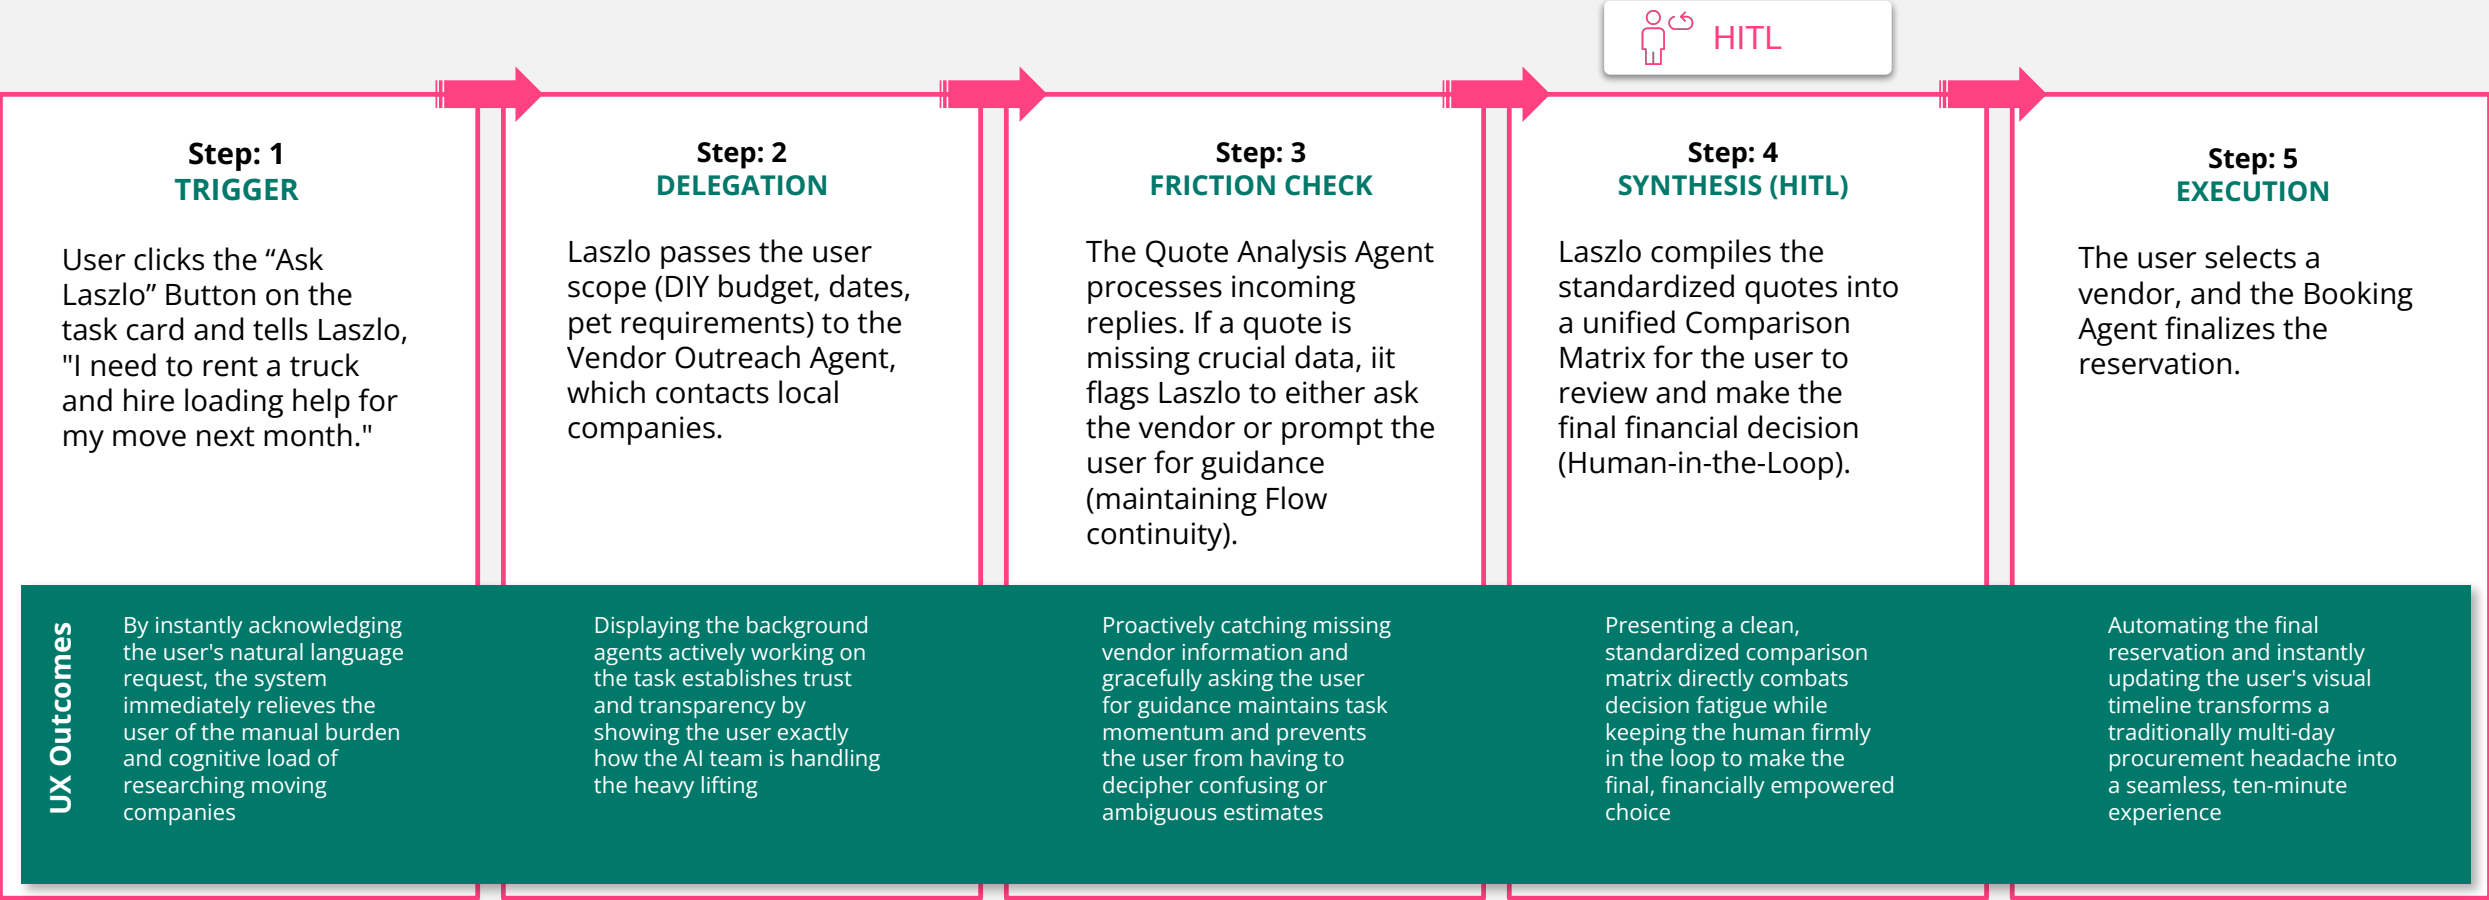

A specialized computer-using agent (similar to OpenAI's Operator) that navigates the chosen vendor's portal or drafts the final confirmation email to secure the move date

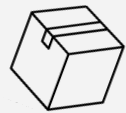

Agentic AI Multi-Agent Workflow

Autonomous AI Execution: Relocation Services Workflow

User Ecosystem Mapping (Human Users + AI Agents)

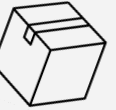

UX Friction Map: Procurement Workflows & Edge Cases

User Groups	Workflows	Tool(s)/Role	Edge Cases/Friction	Resolution	Impact
Human Experience					
 Sarah Miller	Initiating the procurement request and making the final selection.	Chat & Comparison Matrix.	✗ Sarah provides vague inventory limits for the truck size.	Laszlo absorbs friction by prompting Sarah to clarify her 2-bedroom inventory before dispatching sub-agents.	Clarifying vague inventory up front prevents generating highly inaccurate quotes that would immediately destroy user trust.
AI Agents Experience					
 Laszlo	Interprets request, delegates, and synthesizes data.	Orchestration framework & Chat UI.	✗ A sub-agent times out or fails to return data.	Laszlo acts as the central shock absorber, using graceful recovery dialogue to keep Sarah engaged while isolating the error.	Using graceful recovery dialogue prevents silent system failures, avoiding user abandonment and costly support spikes.
 Vendor Outreach Agent	Contacting vendors.	Web/Email APIs.	✗ A vendor's system blocks the automated request or takes days to reply.	System maintains "Flow" by processing vendors who do reply, rather than stalling the matrix	Maintaining "Flow" by skipping unresponsive vendors prevents frustrating delays that cause users to leave.
 Quote Analysis Agent	Extracting pricing and terms.	Document Parser/MCP.	✗ Unstructured PDF doesn't explicitly state one-way drop-off fees.	Agent flags the low-confidence item to Laszlo, acting as a HITL checkpoint to ask Sarah how to proceed, avoiding hallucination	Using a human-in-the-loop checkpoint avoids hallucinating missing fees, preventing severe reputational damage and financial liability.
 Booking Agent	Securing the reservation.	Vendor Booking Portals.	✗ Vendor portal updates its UI, causing the agent to stall.	Agent uses an "escape hatch" to gracefully cede control back to Sarah to manually finalize the booking.	Providing an "escape hatch" for manual booking prevents point-of-sale failures, protecting the user experience and revenue.

Interface Visualization 1

Trigger & Delegation

2 DELEGATES

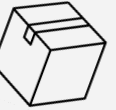

User clicks the "Ask Laszlo" Button on the task card and tells Laszlo, "I need to rent a truck and hire loading help for my move next month."

The screenshot shows the 'ready.' app interface. At the top, there's a navigation bar with 'My Journey', 'Making Moves', and 'Explore'. Below this, a user's request is shown: 'I need to book full-service movers for my upcoming move'. A response from Laszlo's team is displayed: 'I'll have my team reach out to local moving companies and gather quotes for you. They'll analyze the options and get back to you shortly with the best choices.' The interface also shows a progress bar for 'Your Moving Journey' from Los Angeles to Miami FL, with stages: Before Move, Moving Day, and After Move. A task card for 'Book Full-Service Movers' is visible, with a progress bar at 60% and an 'Ask Laszlo' button. Below this, there's a section for 'Set Up Mail Forwarding'.

1 TRIGGERS

Laszlo passes the user scope (DIY budget, dates, pet requirements) to the Vendor Outreach Agent, which contacts local companies.

Interface Visualization 2

Friction, Flow & HITL Review

3

FRICTION CHECK

The Quote Analysis Agent processes incoming replies. If a quote is missing crucial data, it flags Laszlo to either ask the vendor or prompt the user for guidance (maintaining Flow continuity).

ready.

I need to book full-service movers for my upcoming move

My team reach out to local moving companies and gather quotes for you. They'll show you the options and get back to you with the best choices.

News! My team has contacted 12 local moving companies and received 8 detailed quotes. I've analyzed them all and identified your top 4 options based on your move profile.

The most affordable option is Budget Movers at \$2,400, but Premium Relocations at \$3,800 includes full-service packing, premium insurance, and unpacking services - which could save you significant time and stress.

You can see the full comparison in the panel to the right. Which company would you like to book?

SYNTHESIS (HITL)

Laszlo compiles the standardized quotes into a unified Comparison Matrix for the user to review and make the final financial decision (Human-in-the-Loop).

4

Interface Visualization 3

Execution & Timeline Integration

5

EXECUTION

The user selects a vendor, and the Booking Agent finalizes the reservation.

ready.

My Journey Making Moves Explore

I need to book full-service movers for my upcoming move

I'll have my team reach out to local moving companies and gather quotes for you. They'll analyze the options and get back to you shortly with the best choices.

Great news! My team has contacted 12 local moving companies and received 8 detailed quotes. I've analyzed them all and identified your top 4 options based on your move profile.

The most affordable option is Budget Movers at \$2,400, but Premium Relocations at \$3,800 includes full-service packing, premium insurance, and unpacking services - which could save you significant time and stress.

You can see the full comparison in the panel to the right. Which company would you like to book?

Book Premium Relocations for me

✓ Perfect choice! I've successfully booked Premium Relocations for your move date. Here's what's confirmed:

- Company: Premium Relocations
- Price: \$3,800 (full-service)
- Services: Packing, premium insurance, climate-controlled truck, unpacking
- Confirmation: You'll receive an email within 30 minutes

I've also added the 'Movers Booked' milestone to your moving journey timeline. Your moving company will reach out 48 hours before your move date to confirm details. Is there anything else you need help with?

Synthetic Personas

Designing for Human Needs and Agent Constraints

Sarah Miller

Age: 34

Location: Seattle, WA to Portland, OR

Role: Freelance Graphic Designer & Pet Owner

Moving Vibe (Quiz Results): DIY Warrior (Budget) + The Planner (Timeline) + Has Pets (Context)

Goal & Frustration: Needs to procure a moving truck and loading help on a budget. Extremely frustrated by hidden mileage fees and disorganized timelines

"I'm perfectly happy driving the truck to Portland myself to stay on budget, but I'm exhausted by hidden mileage fees and trying to coordinate reliable loading help. I just need a granular, transparent plan that accommodates my dog and leaves me in control."

Laszlo & His Team

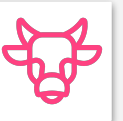

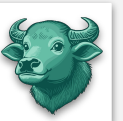

Who is Laszlo? Laszlo is the central "Manager Agent." He translates natural language into delegated sub-tasks, acting as the platform's friendly orchestrator.

Personality & Behavior: Designed to be consultative and approachable, Laszlo builds trust and patience. He proactively anticipates needs based on the user's "DIY Warrior" profile, maintaining a warm flow even when vendor data is messy.

Team Collaboration: Laszlo prevents cognitive overload by delegating research to specialized background agents (Vendor Outreach, Quote Analysis, Booking). These agents extract unstructured data, while Laszlo synthesizes their findings into clean comparisons. This ensures the user maintains final financial control.

"Moving is stressful enough, so I'm here to do the heavy lifting! I'll track down the best truck rentals for your budget, and you just tell me which one looks good."
